CALCUTTA, the 15th December 1925.

## DISTRICT REPORTS ON WEATHER, AND CROPS.

For the week ending on the 6th January 1926.

**Summary.**—The weather continued dry. Reaping of winter paddy still continues and threshing is proceeding briskly. Transplantation of summer rice, harvesting of potatoes, and pressing of sugarcane are going on under favourable conditions. The state and prospects of standing crops are satisfactory. With the influx of new rice in the market the average price of common rice for the Presidency has fallen by about 1.30 per cent. as compared with that of the previous week.

## DEPARTMENT OF AGRICULTURE, BENGAL.

## Monthly Weather and Crop Report of Bengal for December 1925.

I. **Character of the season.**—The weather was practically dry excepting a few scattered showers in places. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Reaping of winter paddy was progressing favourably and the threshing operation commenced in certain districts. Preparation of lands for and transplanting of summer paddy commenced. Cutting and pressing of sugarcane were also progressing.

III. **State of standing crops.**—The standing spring crops were thriving under dry and sunny weather.

IV. **Prospects and probable outturn.**—The outturn of winter *til* was estimated at 79 percent. of the normal. The prospects of cotton, sugarcane and other spring crops were reported to be satisfactory.

V. **Damage to standing crops.**—No appreciable damage to the standing crops was reported during the month.

VI. **Condition of agricultural stock.**—The condition of live-stock was fair. Sporadic cases of cattle-disease were, however, reported from eleven districts.

VII. **Failure of pasture and fodder.**—No scarcity of fodder was reported from any of the districts.

VIII. **Prices of food-grains.**—During the second half of the month the price of the cheapest quality of rice rose in 7 districts, fell in 13 and remained stationary in the rest of the Presidency. The prices ranged from 8 seers at Midnapore to 5 seers at Jessore.

IX. **Condition of agricultural population.**—The condition of agricultural population was generally reported to be fair.

## DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 13th January 1926.

**Summary.**—During the week light rain fell throughout the province. Reaping of winter paddy is almost completed; threshing is in full swing. Harvesting of potatoes and pressing of sugarcane are progressing. The recent rainfall benefitted the summer paddy and was helpful for the preparation of lands for autumn crops. The standing crops are thriving. The average price of common rice for the province has fallen by about 0.3% per cent. as compared with that of the previous week.

#### DEPARTMENT OF AGRICULTURE, BENGAL.

##### First Forecast of the Wheat Crop of Bengal, 1925-26.

NOTE.—On an average of the five years ending 1923-24, the area under wheat in Bengal has represented some 0.4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage to total wheat acreage in (a) British India and (b) in the territory now reported on has, in the five years ending 1923-24, averaged (a) 42.2 and (b) 14.7 per cent., respectively.

**Explanatory.**—Four forecasts of the wheat crop are published. This forecast deals only with the area sown and the general condition of the crop in its early stages.

**Acreage.**—According to the estimates of the District Officers the total area sown amounts to 130,600 acres against 127,300 and 126,400 acres reported, respectively, in the corresponding and final forecasts of last year.

**Character of the season.**—With sufficient soil moisture as a result of rainfall during the months of September and the first half of October the sowings commenced at the normal time except in Dinajpur and Bogra where they were a little late. Dry and sunny weather in December was helpful to the growth and the present outlook is, so far, promising on the whole.

G. P. HECTOR,  
Director of Agriculture, Bengal (offg.).

DACCIA,

The 15th January 1926.

CINCHONA PLANTATIONS AND FACTORY IN BENGAL FOR THE YEAR  
1924-25.**

**Cinchona.**

CALCUTTA, THE 22ND JANUARY 1926.

**RESOLUTION—No. 899.**

**READ—**

The sixty-third annual report of the Government Cinchona Plantations and Factory in Bengal for the year 1924-25.

**READ ALSO—**

The report of the previous year.

Mr. C. C. Calder officiated as Superintendent throughout the year.

The area under cinchona at the end of the year was 3,060 acres. No extension of any importance was carried out at Mungpoo and Munsong, but other ranges have been explored with the result that an area of about 600 acres has been found in the Latpanchor forest with conditions sufficiently favourable to justify the cultivation of experimental plots.

The quantity of cinchona harvested during the year was considerably less than in the year 1923-24. This appears to have been due to the large stocks of bark already held at the factory as the total quantity of bark worked up at the factory was some 54,000 lbs. more than in the previous year. Rather more than half of this bark was Java bark belonging to the Government of India.

The quantities of quinine sulphate and other alkaloids prepared from provincial bark were almost the same as last year, the figures being 19,230 lbs. of quinine sulphate and 8,348 lbs. of other alkaloids. There was a considerable increase in the total outturn of the factory, but this was in products from Java bark.

The manufacture of quinine tablets for sale through post offices has been transferred from the Juvenile Jail, Alipore, to the Presidency Jail. Machines for the manufacture of these tablets have been ordered and will be installed at the Mungpoo factory. The manufacture of the tablets will then be transferred to Mungpoo. Provision has also been made for the erection of ferro-concrete tanks for storing quinine in the crude form, as storage in tins has been found unsatisfactory.

The financial results were again satisfactory, although the surplus receipts over expenditure fell from Rs. 4,56,825 in 1923-24 to Rs. 4,42,934 in the year under report, and the value of stock at the end of the year was almost Rs. 30,000 less than at the beginning. The total expenditure was Rs. 3,33,626, being slightly lower than in the previous year. The receipts including the jail share for the sale of quinine tablets were Rs. 7,76,560 and were some Rs. 16,000 less than in 1923-24.

Although the quantity of quinine salts supplied to dispensaries and District Boards in Bengal increased by more than 1,600 lbs., there was a decrease of more than 3,300 lbs. in the total quantities sold. This decrease was compensated for by an increased demand for cinchona febrifuge, to meet which 5,000 lbs. had to be obtained from Madras. The price of quinine sulphate fell during the year from Rs. 28 to Rs. 24, and there were similar reductions in prices of other products.

The thanks of Government are due to Mr. Calder for his sound administration of the plantations and to Mr. Shaw, Government Quinologist, for the successful working of the factory.

**ORDER—**Ordered that this resolution be published in the *Calcutta Gazette* and that a copy with a copy of the report be submitted to the Government of India.

By order of the Governor in Council,

W. S. HOPKYNNS,

*Secretary to the Government of Bengal.*

**RESOLUTION ON THE REPORTS ON INLAND EMIGRATION FOR THE YEAR  
ENDING THE 30TH JUNE 1925.**

**GOVERNMENT OF BENGAL.**

**REVENUE DEPARTMENT.**

**Emigration.**

CALCUTTA, THE 16TH JANUARY 1926.

RESOLUTION—No. 723Emi

READ—

The Reports on Inland Emigration under the Assam Labour and Emigration Act, 1901 (VI of 1901), for the year ending the 30th June 1925, submitted by the Superintendent of Emigration, Calcutta, and the District and Assistant Superintendents of Emigration.

There was a noticeable decrease in the number of emigrants despatched to the labour districts during the year under review as compared with the previous year, but the total number was still greater than those of 1921-22 and 1922-1923.

2. Recruitment in Bengal was, as in previous years, confined to the districts of Bankura, Birbhum, Burdwan and Midnapore. The number of garden sardars employed during the year was 215 as against 253 in the preceding year. All worked under the supervision of licensed local agents. The number of local agents' licenses issued was 18 as against 21 licenses granted in the previous year. The total number of emigrants registered by garden sardars in Bengal was 406 as against 217 in the preceding year. The largest number registered was in the Midnapore district, viz., 369. The total number of recruits from Bengal and other provinces embarking at Goalundo was 12,625 (including two remaining at Goalundo at the close of the previous year) as against 17,054 in the preceding year.

3. Arrangements for river transport were satisfactory. Only one death due to cholera occurred at the halting station at Kharagpur, and there was no death at the other two halting places at Asansol and Naihati. Of the 12,638 emigrants, who arrived at Goalundo from the recruiting districts in and outside the Presidency of Bengal, five deserted, eight were released, and two died. There was no casualty amongst the emigrants during their journeys by steamer from Goalundo or by railway from Chandpur to their final destination. There was one case of desertion amongst the emigrants who embarked at Goalundo for the Brahmaputra Valley.

4. In connection with the transport of labour to Assam, receipts amounted to Rs. 1,796 as against Rs. 2,100 in the preceding year, while the expenditure increased from Rs. 7,781-12-1 to Rs. 13,595-6-2.

5. The office of the Superintendent of Emigration, Calcutta, was held by Lieutenant-Colonel C. A. Gourlay, I.M.S., from the beginning of the year under review up to the 18th October 1924, when he proceeded home on leave after making over the charge to Lieutenant-Colonel A. Denham White, I.M.S., who held the appointment from the 19th October 1924 to the end of the year under review. The thanks of the Governor in Council are due to both these officers and also to the local officers for their assistance in the administration of the Act.

By order of the Governor in Council,

W. S. HOPKINS,  
*Secretary to the Government of Bengal.*

## Final Forecast of the Sugarcane Crop of Bengal, 1925-26.

NOTE.—On an average of the five years ending 1923-24, the area under sugarcane has represented some 7.6 per cent. of the total area under sugarcane in British India.)

**Character of the season.**—As indicated in the second forecast the weather was favourable at the outset. But heavy rains before the setting in of the monsoon adversely affected the outturn in the important districts of North Bengal. In East Bengal, particularly in the Dacca Division, a good crop has been reaped, whereas in West Bengal the crop somewhat suffered from insufficient rain.

**Acreage.**—The total area planted with the crop for the province is estimated at 215,000 acres this year as against 206,200 acres last year.

**Outturn.**—According to the estimates of District Officers, the average outturn of the crop for the province works out at 85 per cent. of the normal this year as against 76 per cent. last year.

Taking  $36\frac{1}{2}$  mannds as the normal yield of cane-gur per acre, the gross outturn for the province is estimated at 245,000 tons this year as against 210,100 tons last year.

**Other sources of Gur.**—The total quantity of *gur* likely to be obtained from date-palm juice and others is estimated at 108,500 tons this year as against 116,700 tons (revised) last year.

The quantity of *gur* for the province from all sources is thus estimated at 353,500 tons this year as against 326,800 tons (revised) last year.

24-Parganas ...	Acres. 4,600	Acres. 1,400	Acres. 1,400	50	100	November. Normal.	The weather was favourable for the crop.
Nadia ...	7,900	6,500	6,800	67	75	Latter part of December. Normal.	The weather was, on the whole, fair. The outturn is below the normal for want of timely rain.
Murshidabad ...	3,600	3,300	3,400	83	75	End of November. Normal.	The effects of weather on the cultivation and growth of the crop were fair. The drought that followed a little after the planting time told a little on the growth of the crop and the outturn is consequently below the normal.
Jessore ...	5,200	2,500	2,300	67	56	December. Normal.	The weather was not favourable.
Khulna ...	1,500	400	400	75	83	.....	The weather was on the whole fair.
Burdwan ...	11,600	13,500	10,400	75	83	Will commence by the 1st week of February next. Normal.	The increase in area is due to timely rainfall. The effects of weather on the cultivation and growth of the crop were fair.
Birbhum ...	9,800	6,090	8,000	92	100	Will commence in February. Normal.	The increase in area is due to favourable weather and its effects on the growth of the crop were good.
Bankura ...	3,100	2,100	3,000	83	83	Not yet commenced.	The increase in area is due to sufficient rainfall at the planting time. The effects of weather on the growth of the crop were fair.
Midnapore ...	6,600	6,400	5,600	58	67	Middle of January. Normal.	The decrease in area as compared with estimate in the second forecast is due to revision. The outturn is expected to fall much below the normal owing to unfavourable weather conditions in planting time.
Hooghly ...	8,200	3,500	3,700	75	96	Not yet commenced.	The increase in area is due to the high price of <i>gur</i> obtained last year and to favourable weather condition at planting time. The weather was, on the whole, favourable, but want of adequate rain slightly stunted the growth of the crop at some places in the Sadar subdivision.
Howrah ...	5,200	3,800	3,800	48	92	Ditto	The effects of weather on the cultivation and growth of the crop were favourable.
Rajshahi ...	7,500	6,000	5,500	100	83	December. Normal.	The decrease in area is due to ordinary fluctuation. Some damage was done to the crop at Natore by constant rainfall. The outturn is expected to fall below the normal owing to the unequal distribution of rain.
Dinajpur ...	29,500	29,500	30,700	80	66	First part of December. Normal.	The increase in area is due to high prices of molasses. The weather was favourable at the planting time, but subsequent heavy rains damaged it to a great extent.

District.	Estimated normal area under sugarcane.	Estimated area under sugarcane.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting of the crop generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8
Jalpaiguri ...	Acres. 6,000	Acres. 5,000	Acres. 4,700	100	83	October to December. Normal.	The decrease in area is due to excessive rainfall. The effects of weather on the growth of the crop were fair. Heavy rainfall caused the outturn to fall below the normal.
Darjeeling ...	200	300	300	83	83	December. Normal.	The effects of weather on the cultivation and growth of the crop were fair.
Rangpur ...	11,900	21,500	22,800	75	75	First week of January. Normal.	The effects of weather were fair.
Bogra ...	6,700	3,900	4,100	90	100	Will commence in February. Normal.	The increase in area is due to the spread of the departmental <i>tanna</i> canes. The weather was favourable and the growth of the crop good.
Pabna ...	5,600	5,000	5,000	83	83	First week of December. Normal.	The weather was favourable at the sowing time, but excessive rain at the intervening period, specially in May, adversely affected the growth to a certain extent.
Malda ...	300	200	400	75	83	Middle of December. Normal.	The increase in area is due to introduction of the Agriculture Department <i>tanna</i> canes. The effects of weather on the growth of the crop were fair. The outturn is below the normal owing to prolonged rains.
Dacca ...	21,100	20,100	22,000	80	93	.....	The increase in area is due to most of the waste lands being brought under cultivation and also to cultivation of failed areas of <i>bhadoi</i> crops. The weather was favourable at the beginning, but early flood damaged the crop to a certain extent and caused the outturn to fall below the normal.
Mymensingh ...	11,100	16,500	16,600	75	100	November and December. Normal.	The weather was favourable on the whole.
Faridpur ...	7,400	6,900	6,700	70	94	December. Normal.	The effect of weather on the cultivation and growth of the crop were favourable, but in some places occasional rain affected the growth.
Bakarganj ...	18,800	29,500	29,000	67	100	January and February. Normal.	The decrease in area is due to extended cultivation of <i>bhadoi</i> crops including jute. The effects of weather were good on the growth of the crops. Damage by stem borer was reported from places.
Chittagong ...	5,300	6,000	6,000	83	92	October to February. Normal.	The weather was favourable. The outturn is expected to fall below the normal on account of injury caused by insect pests in some parts of the district. The prospect of <i>tanna</i> sugarcane which was newly introduced is reported to be favourable.
Tippera ...	6,100	4,100	3,900	67	75	November. Early	The decrease in area is due to excessive rainfall.
Noakhali ...	800	1,300	1,600	83	83	November. Normal.	The increase in area is due to high price of molasses. The weather at planting time was not favourable.
Chittagong Hill Tracts.	1,000	1,000	1,000	80	75	End of December. Normal.	The weather was fair on the whole. Want of rain at the sowing time caused the outturn to fall below the normal.

## DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 27th January 1926.

**Summary.**—The week continued dry. Threshing of winter paddy, reaping of early oilseeds, pulses and potatoes and picking of cotton and crushing of sugarcane are going on under favourable conditions. Ploughing of lands for autumn paddy and jute is progressing. The standing crops are thriving well. The average price of common rice for the Presidency has fallen by about 0.19 per cent. as compared with that of the previous week.

## CALCUTTA IMPROVEMENT TRUST.

Notice under section 63 (2) of Bengal Act V of 1911.

*Plan of Proposed Public Street No. IV (Maniktala)—Ultadingi Main Road Widening.*

NOTICE is hereby given under section 63 (2) of Bengal Act V of 1911, as amended by Bengal Act III of 1915, that the Board of Trustees for the Improvement of Calcutta has prepared a plan of a Proposed Public Street in Wards Nos. 3 and 29 of the Calcutta Municipality known as Maniktala Alignment No. IV (Ultadingi Main Road).

The plan provides for (i) the construction of an 84 feet road from Gouribere Lane with necessary space for the slope of embankment running eastwards to Canal West Road. Thence across the Circular Canal running eastwards to its junction with the proposed Alignment No. VI (Maniktala), (ii) the widening to 100 feet of Ultadingi Main Road from this junction running eastwards to its junction with the Eastern Bengal Railway Bridge, (iii) thence the construction of a 120 feet road running in a south-easterly direction to the junction of proposed Alignment No. V (Maniktala).

The Proposed Public Street will pass through the following municipal holdings:—

**Gouribere Lane.**—Nos. 3-9A, 3-9B, 3-9C, 3-10, 3-11, 3-12, 3-15, 3-16A, 4A, 5, 6, 6-1, 7, 10, 10-1, 11-1A, 11-1B, 11-1-1A, 11-1-1B, 11-2 and 11-C.
